Looking for the ideal manual pipette to correctly measure and dispense liquid samples can be a daunting task given a lot of choices accessible on the market. Don't stress because Lab.Equipment can cut the frills for you! Learn how the Eppendorf 0.25mL single channel adapts to your accuracy and accuracy needs. If it doesn't make your cut, go through our review, FAQ, and single channel comparison 0.25mL to other pipettes below to get the best unit for your protocols. Lab.Equipment carries 877 pipettes from all 16 pipettor manufacturers, including Eppendorf. With relevant information about these pipettes, expect to find real descriptions carefully written for you. We're not like any other single distributor around as we wouldn't just push a wallet that shows repeating keywords, gergons, and terms of propriety most manufacturers give us diligent lab staff more. Allow us to help you filter out unnecessary time and not miss as well as budget with real meticulously written descriptions to help you find the most suitable Pipette for your lab application, whether it's with this Eppendorf Reference 2 Single Channel 0.25mL or not. The transport and delivery of liquid samples are basic tasks performed in chemistry, molecular biology, biochemistry, medical and scientific laboratories. Are you looking for high-quality pipettes that can withstand the daily use of the laboratory and are easy to maintain? You can opt for a manual pipette such as the Eppendorf Eppendorf Reference 2 Single Channel 0.25mL. Compared to electronic ones, a manual pipette is more convenient and is ideal for use in specific laboratory applications that don't actually have high pipette needs. How many measured liquid solutions can be transported and done without the Single Channel 0.25mL manual? The Eppendorf Reference 2 Single Channel 0.25mL manual is set to correctly transmit liquid samples from 250 to 2,500 μ L volumes. I work on normal pipette tasks that deal with low amounts of liquids, what kind of manual pipette should I shop? You can improve daily pipette activities for biology, pharmaceutical, scientific or chemical laboratories with a manual single-channel pipette such as the comfortable and lightweight Eppendorf Single Channel 0.25mL. Is the Eppendorf Single Channel 0.25mL a fixed or variable volume pipette? The Eppendorf Eppendorf Eppendorf Reference 2 Single Channel 0.25mL manual can be adjusted and can provide a volume that varies according to the particular essay or running application. We will not waste your time playing the phone tag with a high pressure sales representative, we will easily use the Instant Quote tool above and receive a quote for the single Eppendorf 0.25mL channel sent to the inbox within 30 seconds! No annoying sales representative calling you. Compared to other manual single-channel variable volume pipettes, how accurate is the single 0.25mL channel? Distribute and transport liquid samples safely with the Eppendorf 0.25mL single channel as it Precision 8/20. Against other manual single-channel variable volume pipettes, how accurate is the Eppendorf 0.25mL single channel? Obtain closing values and safe reproducibility of pipetting activities via the single manual single channel volume Single Channel 0.25mL which has repeatability 3/7.5. How effortlessly is single Channel 0.25mL to maintain and clean? Eppendorf Single Channel 0.25mL is autoclavable, ensuring safety, hygiene and sterility for use in other laboratory applications. Do you have any questions about the Eppendorf Single Channel 0.25mL Lab Tube that we've lost answering for you here? Feel free to ask through the live chat on the right, our Contact Us page, or email to [secure email] and we will get there as soon as possible with a friendly response. The Eppendorf Reference 2 is our premium product. In addition to improving its ergonomics, the focus design was based on providing the most accurate results possible, optimal user safety, reliability and robustness for a long life span. The innovative single-button operation is not only fast and easy, but also allows the active reduction of the aerosol and therefore protects the user, the sample and the pipette. The sturdy handle made of stainless steel protects the pipette from impact and in combination with the spring bumpers the Reference 2 is likely to remain inside the calibration even if it requires a fall. These high levels of safety make Datum 2 ideal for use with precious liquids or in any application that requires extremely high levels of accuracy. When there can be no compromise on quality and reproducibility, Eppendorf Reference 2 is an ideal tool for these liquid management applications. Single button operation Object of operational forces for suction/dispensing/strain extraction limit tip on the user. It allows users to move faster through their pipetting tasks by not having to move their thumb from side to side to eject the tips. With the ability to expel a tip immediately after dispensing, aerosol contamination of the pipette is greatly reduced. User-Friendly secondary adjustment For liquids other than aqueous pipette solutions, they must be adjusted. Datum 2 offers an easy chance to do so, leaving factory settings intact. Tips for the ar settings provided. Reset the manufacturer setting just as quickly and easily. The unique one-button function provides fast, ergonomic handling with reduced operational effort and active aerosol reduction. To avoid accidental tip ejection, clear tactile feedback The spring-loaded tip cone improves user reproducibility and improved ergonomics by lowering the tip attachment The multichannel reference 2 offers high flexibility in a spring-loaded tip conifer that can optionally be turned on/off Secondary adjustment supports easy adjustment of reference 2 for more accurate piping of different liquids or other external conditions without the need for a complete suit Quick Lock enables easy pipette cleaning and maintenance The exceptional accuracy and accuracy of Datum 2 provides reliable 4-digit volume display results with a magnifying window to make it easier to identify the external volume external edges made of stainless steel equip the pipette with exceptional robustness A built-in RFID chip contains all the relevant pipette data and offers with Eppendorf Track! IT simple identification and documentation For more than 70 years, Eppendorf has innovated and provided premium laboratory tools and consumables for various facilities working on liquid handling, sample preparation and cellular management applications. Offering a wide range of versatile laboratory equipment, including laboratory pipettes, automated pipetting systems, spectrometers, ultra-temperature freezers, and robust laboratory materials such as pipette tubes, sample tubes, and microtiter plates, Eppendorf gives way to unprecedented laboratory efficiency and improved workflows. With products designed to meet the highest standards, Eppendorf guarantees the best quality products possible, ideal not only for academic and commercial research, pharmaceutical, clinical and biotechnological laboratories, but also for sectors such as food, forensics and chemicals. Explore Eppendorf's innovative product line available on Lab.Equipment, including: Product descriptions and attribute groupings, and assignments on this page are copyrighted to all rights reserved. If copied, you will be prosecuted to the full extent of the law, including infringement fees of up to \$10,000 per page of content. [Pipette] Precision (%/ μ L): 8/20 [Pipette] Autoclavable: Yes [Pipette] Repeatability/Precision (%/ μ L): 3/7.5 [Pipette] Variable or Fixed Volume: Variable Volume [Pipette] Volume Range Max (μ L): 2500 [Pipette] Volume Range Min (μ L): 250 liquid measurement and transfer samples correctly depend on your manual pipette. Looking for the perfect one to meet the requirements of your specific application can be an overwhelming task with a plethora of manual pipettes available on the market. Don't worry about how Lab.Equipment is here to simplify the drive selection process! Learn how the 2mL Eppendorf Single Channel Fixed adapts to your accuracy and precision needs. If it doesn't make your cut, read our review, FAQ and single channel fixed 2mL comparison with other pipettes below to find the right unit for application requirements. Since Lab.Equipment showcases 877 pipettes from all 16 pipettor manufacturers like Eppendorf, this is the only site you'll

find real product descriptions meticulously written for you. Unlike another single distributor around, we wouldn't push you a portfolio of products stuffed with repeated keywords, gergons and terms of propriety that many manufacturers give for puzzles us hard-working lab staff. We can help you filter out unnecessary and not wasted time as well as budget with real descriptions carefully to lead you to find the perfect Pipette for lab application, whether it's this Eppendorf Reference 2 Single Channel Fixed 2mL or not. The transport and delivery of liquid samples are basic tasks performed in the laboratories of biochemistry, medicine and science, chemistry and molecular biology. Do you need durable pipettes that can withstand the daily use of the laboratory and are simple to maintain? You can opt for a manual pipette such as the Eppendorf Eppendorf Reference 2 Single Channel Fixed 2mL. Compared to electronic ones, a manual pipette is cheaper and is recommended for use in specific laboratory applications that do not actually have high pipette requirements. How many liquids can be transferred and discharged with the Single Channel Fixed 2mL manual? The Eppendorf Reference 2 Single Channel Fixed 2mL manual is set to fully deliver liquid solutions up to 2000uL. Performed routinary pipette tasks that deal with small amounts of liquids, what kind of manual pipette should I shop for? A single-channel manual pipette such as the convenient and lightweight Eppendorf Single Channel Fixed 2mL can help improve normal pipetting activities for pharmaceutical, scientific, chemical or biological laboratories. Is the Eppendorf Single Channel Fixed 2mL a fixed or variable volume pipette? The Eppendorf Single Channel Fixed 2mL fixed volume manual can help minimize the risk of errors caused by improper volume delivery or cross-contamination. A fixed volume pipette such as the single Channel Fixed 2mL can deliver the same fixed amount of dense or viscous liquid solutions, giving way to a faster work process without the need to change volumes often. We will not waste your time playing phone tag with a high pressure sales representative, just use the instant quote tool above and you will get a quote for the Eppendorf Single Channel Fixed 2mL delivered to your inbox within 30 seconds! No annoying sales representative calling you. How accurate is the Eppendorf Single Channel Fixed 2mL compared to other manual single-channel fixed volume pipettes? Distribute and transfer liquid samples with confidence with the Eppendorf Single Channel Fixed 2mL as it provides 0.6/12 accuracy. Compared to other manual single channel fixed volume pipettes, how accurate is the Eppendorf Fixed 2mL Single Channel? Ensure the reproducibility of pipetting applications with the single fixed fixed channel channel with manual 2mL fixed channel that has repeatability 0.2/4. How effortlessly is the Single Channel Fixed 2mL to maintain and clean? The Eppendorf Single Channel Fixed 2mL is autoclavable, ensuring sterility, hygiene and safety for use in other laboratory applications. Do you have any questions about the Eppendorf Laboratory Tube Channel Fixed 2mL that we've lost answering for you here? Feel free to ask through the live chat on the right, our Contact Us page, or email to [secure email] and we will get there as soon as possible with a friendly response.
